

Business Brief

SkillSwap is a peer-to-peer skill exchange platform where users trade skills instead of paying money. It uses AI to match users and enable learning through real interaction.

Website Goals

Explain the concept clearly, highlight AI capabilities, and convert visitors into users, partners, or investors.

Target Audience

Students, young professionals, universities, incubators, and corporate teams.

Features Required

AI matching engine, video sessions, skill credits, ratings, dashboards, and onboarding system.

Design Preferences

Clean, minimal, high contrast UI with readable text, modern layout, and simple interaction.

Tools Used

React, Tailwind CSS, JavaScript, Node.js, OpenAI API, PostgreSQL, Neo4j.
